

MUSTC223 / Fireport Instructions

How to transfer from Alesis HD24 record drive to your firewire drive

1. Dismount record drive from the Alesis HD24
2. Connect record drive to Alesis Fireport Adapter (available in studio office). Also connect Fireport adapter to Mac via firewire.
3. The Mac will give you an option to ignore, eject, or initialize the drive. IGNORE IT (or it will erase the drive)!
4. Open Alesis FST Connect software on Mac (Should be in the dock).
5. Select ADAT -> Mac transfer at the top right of the interface.
6. Select your project and then select your song.
7. Use the choose button to select a folder for the files to export to and a file type (WAV is the best way to go).
8. Use the drop down menu to choose to export a whole song (all tracks) or by track.
9. Select the song, or tracks, you want to export and press... export.
10. Say abracadabra (optional)
11. Double check that the exported files are on your firewire drive.
12. Quit FST connect and dismount your firewire hard drive before disconnecting anything.
